

HYBRID FIXATOR LARGE BAR FIXATOR RAIL FIXATOR

RING FIXATOR

Standard, Small and Ankle with Hybrid and Ring Fixator compatibility

Combining Strength, Versatility and Flexibility the UniX Uniteral and Ring Fixator System

- Standard Unilateral Fixator

- Ankle and T-Clamp options

- Mechanical locking of articulating components

allows for non-slip locking

- Modular system - maximum flexibility

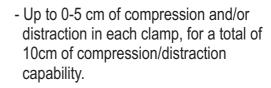

Part of the Ring Fixator Family, allowing

easy conversion to a hybrid or complete ring fixation system

The UniX Unilateral Fixator

- Serrated locking connectors provide a non-slip locking mechanism.
- Connectors each provide 120° of articulation.
- Central component provides 360° rotation.

- Modular system maximum flexibility.

UniX Ankle Clamp

- Provides acute and/or long-term treatment option.
- Compatible with percutaneous reduction and fixation techniques.
- Proven C-clamp design allows imaging compatibility.
- No templates required.
- Serrated connectors provide a non-slip locking mechanism.
- Modular system.
- Maximum flexibility.

- Fully convertible to the Ring Fixator system.

Advanced Screw Clamp

- Provide desired screw position on the ring
 - Fully adjustable screw height angles.

Bolt, Nut, Washer

- Titanium bolt, nut and washer provide lightweight frame and improve MRI compatibility.

Telescopic Strut

- Provide to convert the frame to the Ilizarov type ring fixator easily
- Gradually adjustable telescopic design.
